

CONVERSION & LOCAL SEO ARCHITECTURE

Lessons of Local Internet Presence

The Mike Stewart Playbook

A Strategic Masterclass in Direct-Response Psychology, Auditory Melodic Earworms, VSL Funnels, YouTube Ad Arbitrage, and AI-Driven Local Market Dominance.

The Traffic & Conversion Axiom

>90% MOBILE TRAFFIC

Traffic without immediate conversion architecture is wasted capital. Within 3 seconds, prospects must know you are the trustworthy local authority who can solve their pain.

15-Sec SERP Term Earworms

COGNITIVE AUDITORY SCIENCE

Anchor your high-intent 3-word Google ranking term into subconscious memory through Involuntary Musical Imagery (21 melodic repetitions bypass cognitive resistance).

YouTube 5-Sec Skippable Loophole

FREE LOCAL TV SATURATION

Google bills \$0 if viewers skip before 30s. Front-load the jingle in the first 5s to harvest 8,000,000 free living-room impressions for pennies on Connected Smart TVs.

The \$1M Retainer Engine

GENERATIVE AI SCALING

300 clients @ \$300/mo = \$1,080,000 ARR. Production bottlenecks eliminated via Google Gemini (scripts), ElevenLabs (cloned voice), and Suno (15-sec AI jingles).

STRATEGIC DOSSIER SPECIFICATIONS

SUBJECT	Mike Stewart Local Internet Presence & Direct-Response Architecture
PRIMARY DOMAIN	Local SEO, Generative Engine Optimization (GEO), VSL Funnels & Video Ads
SOURCE MATERIAL	LocalInternetPresence.com & Full 2026 Chris Koerner Master Interview
TARGET APPLICATIONS	Derivative Genius Platform Architecture, Client Acquisition & /centurion Engine
CLASSIFICATION	Executive Operational Playbook • Internal & Partner Distribution

PART 01

Executive Summary & Core Philosophy

Mike Stewart is a 35-year veteran of radio, television broadcasting, music production, audio engineering, and direct marketing based in Nashville, Tennessee. A former member of the classic pop group The Box Tops, co-producer of the historic platinum novelty hit Pac-Man Fever, and producer of all Waffle House jukebox records (earning a Golden Waffle for "Raisin Toast"), Mike stands as one of the original pioneers of internet multimedia.

Over 20 years ago, alongside legendary copywriter Jim Edwards and direct-response titan Dan Kennedy, Mike co-invented the Video Sales Letter (VSL) when Flash video was first introduced. He proved that human video and direct-response psychology can crush multi-million-dollar corporate agency websites.

THE FOUNDATIONAL THESIS

Rather than posting a lot of jargon on this website that means nothing to most business owners... To GROW your business today, you must have a local internet presence. What I do for businesses, no one else is doing.

— Mike Stewart, LocalInternetPresence.com

Where conventional digital agencies sell abstract "brand awareness", vanity aesthetics, and aimless social media management, Mike Stewart focuses on high-intent lead capture, auditory brand retention (earworms), and frictionless conversion funnels engineered specifically for local service contractors (pest control, plumbers, roofers, HVAC, boat rentals, and specialized trades).

The Traffic & Conversion Axiom

Mike strips away agency jargon and simplifies the entire digital economy down to two immutable variables:

- **1. Traffic Acquisition:** Getting qualified local prospects to discover your business on whatever screen they hold (>90% mobile devices for local home service calls). There are only three ways to acquire traffic: Paid (Google Search & YouTube Ads - fastest, guaranteed, controllable), Organic (Google Business Profile, SEO & Generative Engine Optimization - compounding, durable), and Borrowed (Affiliates, chambers of commerce, and local networking referrals).
- **2. The 3-Second Conversion Threshold:** Within 3 seconds of a prospect touching down on your web asset, are they immediately convinced you are the legitimate, trustworthy local authority who can solve their urgent pain? If not, they bounce to your competitor.

The 2026 AI Production Paradigm Shift

For three decades, executing this local marketing strategy required high-end Nashville sound stages, professional session singers, studio mixing engineers, and weeks of manual audio-video production, billing clients \$2,000+ upfront. With modern generative AI tools (Google Gemini for semantic scripting, ElevenLabs for voice cloning, and Suno for musical earworms), Mike transformed an artisanal production process into an infinitely scalable, low-friction monthly retainer (\$300-\$500/month) where the business owner does zero manual labor.

PART 02

The 5 Pillars of Local Dominance

Rather than treating digital marketing as an ad-hoc collection of tactics, Mike organizes local market dominance around interdependent operational pillars:

01 Google Profile MAP PACK AUTHORITY • Strict NAP verification • Drown bad reviews with 5-stars • Daily job photo updates	02 Owned Web & GEO SEMANTIC BACKLINKS • Brain-to-tongue voice • Full on-site transcripts • Apple/Spotify syndication	03 Conversion VSL DIRECT RESPONSE • Problem-Agitate-Solve • Guaranteed or Free offer • Sticky thumb tap-to-call	04 SERP Earworms AUDITORY SATURATION • 15-sec INMI melodic jingle • 5-sec skippable YouTube • Smart TV living room saturation	05 Consultative 1-on-1s LOCAL TRUST SALES • In-person BNI/Chambers • 20-min diagnostic audit • High-retention retainers
--	---	--	--	--

Pillar 1: Google Business Profile (GBP) & Map Pack

The single most valuable digital pro

- **Claim, Verify & Strict NAP:** Ensure absolute Name, Address, and Phone consistency across all public web directories to prevent algorithmic de-ranking.
- **The Drown-Out Review Engine:** Negative reviews cannot be deleted; they must be drowned out. Establish an automated operational habit of asking every satisfied customer for a 5-star review to permanently dilute negative ratings.
- **Algorithmic Activity Signals:** Google prioritizes businesses that actively maintain their profiles. Uploading real job photos and responding to every customer review signals to Google that the company is thriving.

Pillar 2: Owned Web Content, Syndication & Generative Engine Optimization (GEO)

Local search is transitioning from static keyword matching to semantic question-answering powered by LLMs (Google Gemini, ChatGPT, Claude, Perplexity):

- **The Open Web vs. Rented Land:** Social media walled gardens (Facebook, Instagram) hide content behind logins, invisible to search spiders and AI training crawlers. Content published on an owned domain URL builds permanent indexing equity.
- **Automatic High-Authority Backlinks:** Broadcasting the client's transcribed audio episodes as an RSS podcast feed across Apple Podcasts, Spotify, Amazon Music, and YouTube generates authoritative backlinks from the most trusted domains on the internet.

PART 03

The Signature Proprietary Weapons (Part 1)

Weapon A: The "SERP Term Jingle" & Cognitive Earworm Science

Every business has a specific 2-to-4-word phrase that triggers them at #1 on Google (e.g., "Nashville Party Boat Rental", "Plumber", "Mount Lawley Pest Control"). The fatal challenge is that prospective customers in the local market do not know the exact phrase. Mike solves this by weaponizing Involuntary Musical Imagery (INMI).

THE 21-REPETITION SUBCONSCIOUS RULE

When you hear marketing information set to melody 20 times, on the 21st time you will never get it out of your subconscious for the rest of your life. Music bypasses critical cognitive resistance and embeds directly into long-term memory.

— Mike Stewart

- **The Pink Plumber Precedent:** Thirty years ago in Smyrna, Georgia, a plumber whose wife survived breast cancer renamed his business The Pink Plumber and broadcast a simple 15-second radio jingle: "Google Pink, click the link, or call 404-222-PINK." Decades later, Atlanta residents who haven't heard the commercial in 20 years still sing the exact phone number and search term.
- **The 15-Second Production Formula:** The optimal jingle length is strictly 15 seconds, structured as: 0s-5s (The Anchor: exact SERP term and core positioning statement sung with high energy), 5s-12s (The Value Proposition: plain-spoken customer benefit), and 12s-15s (The Direct Call to Action: "Search [SERP Term] today!").

THE GOLDEN PRODUCTION RULE

We do not give clients a choice on production of the jingle, nor have I ever. Business owners invariably want to insert complicated slogans, awkward rhymes, or personal musical preferences that destroy the earworm effect. We write the lyrics, pick the music, and follow the formula. Trust us and don't help.

— Mike Stewart

Weapon B: The 5-Second Skippable YouTube Pre-Roll Arbitrage

YouTube is the world's second-largest search engine, and more than 50% of local YouTube viewing occurs on Connected Smart TVs in family living rooms. Mike discovered an advertising billing loophole within Google Ads:

MANDATORY 0s - 5s WINDOW

- 15-sec SERP term jingle starts immediately
- 100% of viewers hear brand & search phrase
- Ad CANNOT be skipped by the viewer
- GOOGLE BILLING: \$0.00 (ABSOLUTELY FREE)

SKIPPABLE 6s - 30s+ WINDOW

- Explains urgent customer pain & proof
- Viewer clicks "Skip Ad" or watches full video
- BILLING: Charged ONLY if watched past 30s!
- Result: Millions of free living-room impressions

- **The Living Room Smart TV Effect:** Stay-at-home parents and children watch YouTube (shows like Bluey) on living room TVs. The remote sits on the coffee table. Even when 70-80% eventually skip, every family member has heard the jingle, company name, and search term multiple times weekly.
- **Ad Targeting Axiom: Geography Over Micro-Targeting:** Reject complex demographic or affinity micro-targeting. Constrain geographic delivery strictly to a tight 15-20 mile radius around the business and let Google's machine learning locate active in-market buyers.

PART 04

The Signature Proprietary Weapons (Part 2)

Weapon C: The Video Sales Letter (VSL) & Landing Page Architecture

Mike Stewart co-invented the VSL with Jim Edwards 20 years ago. Their foundational discovery: "People will watch before read." Bloated multi-page corporate agency websites leak prospects at a 90% bounce rate.

THE 5-ELEMENT LOCAL VSL CONVERSION FUNNEL

- 1. Risk-Reversal Headline** — Dan Kennedy guarantee: "Guaranteed or it's free"
- 2. 60-Second Video Explainer** — Owner explains problem, solution & plays jingle
- 3. Social Proof Container** — Live Google 5-Star review carousel & trust badges
- 4. Plain-Spoken Sales Copy** — Problem-Agitate-Next Step copy with FAQ schema
- 5. Sticky Mobile CTA Anchor** — Persistent bottom tap-to-call button in thumb zone

The Universal Direct-Response Headline Formula

TESTED ACROSS HUNDREDS OF LOCAL BUSINESSES FOR 15+ YEARS

"We will give you the most thorough, amazing, unbelievable [Service] service guaranteed or it's free."

— The Dan Kennedy / Mike Stewart Risk Reversal

Local homeowners searching for emergency repairs (water flooding basement, AC out in July heat) are terrified of being ripped off. This headline eliminates buyer risk entirely. In 15 years, Mike reports that virtually nobody requests a refund—homeowners simply want reassurance.

Dan Kennedy's "Watch My Video" PPC Ad Formula

When driving Google Ads traffic to these landing pages, Mike structures ad copy using Dan Kennedy's Problem -> Agitate -> Next Step sequence:

PPC AD HEADLINE & DESCRIPTION STRUCTURE

"Tired of termites? Scared termites are eating your home? Want them gone and solved today? Watch my video."

— Dan Kennedy PPC Formula

Adding the specific instruction "Watch my video" to Google Ads copy quadrupled click-through rates (CTR) because it promises immediate visual clarity over dense sales text.

Weapon D: The "Brain to Tongue" Content Machine

THE COGNITIVE LAW OF CONTENT CREATION

It is a much shorter distance from your brain to your tongue than it is from your brain to your hands.

— Mike Stewart

Contractors freeze when asked to sit at a keyboard to write articles. Mike bypasses this block with a 5-step extraction routine: (1) Ask: "Name 50 specific problems your business solves." (2) Deconstruct generic services (e.g., break "we kill bugs" into subterranean termites, bedbugs, roaches). (3) Ask the technical diagnostic question: "What are subterranean termites and why do they destroy foundations?" (4) Capture the natural spoken stream (contractors cannot be shut up once asked about their craft). (5) Transcribe verbatim into on-site blog posts and syndicate audio as a weekly podcast.

AI Production Workflows & Industry Traps

The AI Production Pipeline & Retainer Automation

Modern generative AI completely eliminates the studio bottlenecks that previously required thousands of dollars in marketing engineering:

AI PRODUCTION & RETENTION WORKFLOW			
Step 1: Gemini Drafts 4 hyper-local FAQ scripts answering local search queries.	Step 2: ElevenLabs Renders voice via 60s sample; instantly dubs into Spanish.	Step 3: Suno AI Synthesizes 15s melodic jingle embedding exact SERP term.	Step 4: Web & RSS Publishes text transcript; syndicates audio to Apple & Spotify.

Critical Contrarian Critiques & Industry Traps

- Critique 1: The "Award-Winning Website" Trap:** Mainstream web design agencies build sites designed to win aesthetic design awards rather than make the phone ring. Mike argues that an award-winning web design is usually a negative indicator of commercial conversion. Full-screen hero video sliders push the value proposition, phone number, and proof far below the fold, driving 90% bounce rates. Eliminating complex hamburger menus and placing a persistent tap-to-call button at the bottom of the screen immediately doubles inbound lead volume.
- Critique 2: The Social Media "Walled Garden" Trap:** Local businesses frequently waste money hiring social media managers to post stock graphics on Facebook or Instagram. Nobody browses Instagram when their sewer pipe bursts or a rat runs across their kitchen floor—they go to Google. Content posted inside Facebook and Instagram lives behind login walls, invisible to Googlebot, OpenAI's GPTBot, and Common Crawl. Blogs, podcasts, transcripts, and RSS feeds live on public web protocols, building permanent, compounding equity on an owned domain.

PART 06

Documented Case Studies & Real-World Proof

The Mike Stewart methodology has generated decades of empirical, documented results across diverse industries:

CASE STUDY 01

West Texas Pest Patrol (Wendell) • Abilene, Texas

Challenge: Solo pest control operator facing entrenched national competitors.

Strategy: Produced a 15-sec custom SERP jingle ("Google West Texas Pest Patrol... no bug will survive") and launched skippable YouTube ads within a tight radius.

Results: Generated 8,000,000 skips (free brand saturation) and 3,000,000 views. Gross revenue tripled and quadrupled; local families heard the ad daily on living room TVs.

CASE STUDY 02

Nashville Party Boat Rental (Jason) • Nashville, Tennessee

Challenge: Pontoon boat captain stranded when previous employer dissolved mid-season.

Strategy: Secured high-volume domain nashvillepartyboatrental.com, built a 1-page VSL with one CTA ("Book Your Boat"), AI jingle, and \$250/mo Google Ads.

Results: Scaled from \$0 to \$80,000 revenue in summer one; booked 40 charters; sold out every weekend; ranked #1 in Google Map Pack and organic search.

CASE STUDY 03

Local Nashville Honey (Susan Stewart) • Nashville, Tennessee

Challenge: Selling artisanal honey through physical retail booths without complex e-commerce shipping.

Strategy: Acquired localnashvillehoney.com, published regular localized blogs on honey varietals and seasonal allergies, and produced a custom AI jingle.

Results: Ranked #1 across Nashville for "local honey near me." In-person booth foot traffic exploded, delivering record sales months with \$0 ad spend.

CASE STUDY 04

Mount Lawley Pest Control (Glenn Mott) • Perth, Australia

Challenge: Solo pest operator setting an aggressive 5-year goal to reach \$500,000 annual revenue.

Strategy: Deployed problem-specific Video Landing Pages, custom SERP jingle, and Google Ads using Dan Kennedy problem-agitation copy.

Results: Achieved his 5-year \$500,000 revenue milestone in year two—3 full years ahead of schedule.

CASE STUDY 05

Haynes Pest Control (Ryan Kenneth Haynes) • Avon Park, Florida

Challenge: Multi-truck pest operation seeking profitable regional expansion.

Strategy: Full VSL landing page framework, 15-second SERP jingle, and skippable YouTube ads with 50% Connected TV viewership.

Results: Grew gross revenue by 23% (+\$172,500) in 7 months; added 7 new employees in 2025; surpassed 1,000,000 online video views.

Commercial Model & Strategic Integration

The Commercial Model & Retainer Tiers

RETAINER TIER SPECIFICATIONS

CORE RETAINER: \$300 / month

- Weekly keyword blog post published to client domain
- Weekly transcribed audio podcast syndicated to 5 apps
- Google Business Profile active updates & photos
- Custom 15-sec AI SERP Term Jingle included

GROWTH RETAINER: \$500 / month

- Everything in Core Retainer (\$300 value)
- Google Search Ads hyper-local campaign management
- Skippable YouTube Video Pre-Roll ad management
- Monthly 1-on-1 Zoom audit & strategy review

The "300 Customer" Million-Dollar Scaling Math

Mike outlines the enterprise scaling potential: 300 retainer clients @ \$500 (ARR). Using modern generative AI workflows, total production time for technical drafting, voice synthesis, and syndication pipeline can be reduced to 10 minutes. Founders focused purely on relationship-building and local consultative sales.

Strategic Applications for Derivative Genius & /centurion

The Mike Stewart doctrine directly provides architectural blueprints for a scalable workflow:

- **Automated /centurion Audit Vectors:** When /centurion scans local business prospects, our audit engine scores these failure points: (1) Paid Google Ads linking to cluttered homepages instead of problem landing pages. (2) Missing sticky tap-to-call mobile button. (3) Hero sliders wasting screen real estate. (4) Inactive Google Business Profiles with fewer than 20 reviews. (5) Walled garden traps with zero owned domain blog articles.
- **The Video Sales Letter Standard:** Every client site deployed by Derivative Genius adheres to the 5-element VSL formula: Dan Kennedy risk-reversal offer, 60-second founder explainer, live Google review carousel, problem-agitation copy, and persistent mobile dialing.
- **Eat Your Own Cooking:** DerivativeGenius.com must embody these principles: featuring direct phone dialing ((310) 379-9822), custom Suno auditory earworms, and frictionless conversion architecture.
- **Active Operational Cross-References:** Directly cross-referenced with DT-01 Offer Packaging & Retainer Tiers in doc/current-development-targets.md, DT-07 Dual-Engine SEO/GEO Architecture, and doc/The-Mission.md.
